

Glider™ PTCA Balloon Catheter

Now Available from Teleflex

Designed for Crossing Complex Lesions

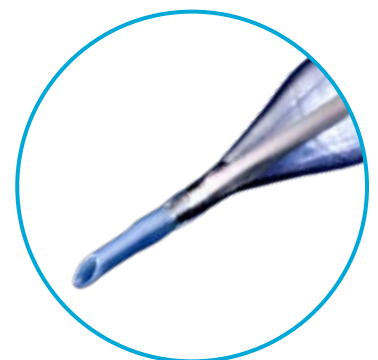

The Glider™ PTCA Balloon Catheter is a semi-compliant balloon with skived tip and low entry profile. The tip design, coupled with hydrophilic coating and an innovative, torqueable shaft, allows for precise tip orientation for use in crossing complex lesions and stent struts.

Features

Low-profile crossability

Demonstrated clinical performance in crossing stent struts and bifurcations¹

Skived tip design, hydrophilic coating, and torqueable shaft allow for precise tip orientation

Glider™ PTCA Balloon Catheter

Now Available from Teleflex

Indications for Use

The Glider™ PTCA Balloon Catheter is indicated for balloon dilatation of the stenotic portion of coronary artery or bypass graft stenosis for the purpose of improving myocardial perfusion.
